

Bianca Hammen

AT&T

Bianca Hammen is a Principle Architect at AT&T. She has 18 years' experience in both pre- and post-sales ICT functions. Among other experiences this includes bid management, solution architecture and design, service management, ITIL processes and integration. She is leading and is working in virtual global teams bringing multiple competencies together to build bridges between several teams within AT&T and the clients. In her current role, she is responsible for identifying new solution and innovative technology opportunities.

Along with her Principle Architect role, Bianca is the CEO of AT&T's EMEA Women Network (AEWN). This is a networking group of about 600 members in over 21 different countries, and its mission is: Together we can build the workforce of the future. By organizing networking events with executive speakers, providing training and mentoring, members of the AEWN develop from a business and a personal perspective. Bianca is passionate about Diversity & Inclusion. To increase female participation in technology, she serves as a role model at schools to engage female students into STEM. By being a language buddy, she is helping the integration of refugees into Dutch Society.
